PLEASE ENSURE YOUR PAYROLL DEPARTMENTS ARE NOTIFIED

REVISED WAGE & BENEFIT SCHEDULES (ATTACHED) for the following provinces: Newfoundland & Labrador (Local 203), New Brunswick (Local 73), Nova Scotia (Mainland) & Prince Edward Island (Local 73), Nova Scotia (Cape Breton Only) (Local 73), Ontario (Local 128), Manitoba (Local 555), Saskatchewan (Local 555), Alberta (Local 146). A revised Wage and Benefit Schedule for British Columbia (Local 359) will be distributed shortly. *A highlight sheet detailing the various changes to each schedule has been attached. Please note the Alberta revisions (Revised April 13, 2012).*

RESOURCE MANAGER/WORKFORCE PLANNING

The BCA and its Board of Directors continue to be concerned about the anticipated shortage of qualified Boilermakers and are continuing to work with the International Brotherhood of Boilermakers (IBB) in the recruitment of Boilermakers from sources outside of Canada to augment the supply of qualified Boilermakers from within Canada. The IBB and all Canadian Locals are also taking additional steps to increase their membership through the development of a recruitment strategy to attract new members under the Canadian National Membership Reserve Program.

While the BCA continues to support these initiatives, both the BCA and IBB recognize the need to develop a more comprehensive supply/demand forecasting model going forward to determine when and where Boilermakers will be required on construction and maintenance projects across Canada. In order to develop and maintain this type of information, the BCA Board of Directors have authorized the BCA to employ a "Resource Manager/Workforce Planner", who will work out of the BCA office and report to the BCA President.

The Resource Manager will develop and maintain comprehensive supply/demand data that identifies the actual needs of BCA contractors across Canada. In order for this initiative to be successful, the

Resource Manager will require support from contractors, the IBB and its Canadian locals and the Owner/Client community. Confidentiality will be maintained, however, general industry information may be shared with the stakeholders as appropriate. This initiative will be an important component of the services provided by the BCA to its member contractors and will be incorporated into the BCA Strategic and Business Plans going forward.

In order to fund this position the BCA Board of Directors has approved a \$0.05/hour contribution, effective May 6, 2012. The BCA recognizes that there may be contractors who have signed fixed price contracts who may be unable to recover this increase in the Boilermaker wage package. The BCA will reimburse all such contractors that can demonstrate their inability to recover the additional costs associated with this program.

Please see the attached wage and benefit schedules that reflect these changes.

NATIONAL TRAINING TRUST FUND

The National Training Trust Fund (NTTF), which is jointly trusteeed by the BCA and IBB, has been playing an important role in training Boilermakers. It has been instrumental in the development of such programs as Field Supervisor Training, Project Management and Rigging Qualifications programs. NTTF staff play an active role in the recruitment of qualified Boilermakers from outside of Canada and have been instrumental in having US Boilermaker qualifications recognized by Alberta Apprenticeship & Industry Training (AIT), which will improve the contractor's ability to attract qualified Boilermakers from the United States. NTTF staff continue to work on having US Boilermaker Welder qualifications recognized by AIT as well.

As the IBB membership demographic changes and younger workers enter the workforce, additional training programs are expected by IBB members and BCA contractors that make use of computers and other technologies that will require additional resources to meet the future demands of the membership and the boilermaker industry.

The NTTF is currently funded through a \$0.05/hour contribution that began when the fund was initially established in 1993. With the increase in training programs and initiatives provided to the IBB membership through the NTTF, the trustees have agreed that additional funding of the NTTF is required to support these programs.

As the Audiometric fund has sufficient funds to support and operate the current programs, the BCA Board of Directors and the IBB have agreed to redirect the current funding of the Audiometric Fund of \$0.03/hour towards the NTTF, and further increase the NTTF fund by an additional \$0.02/hour (for a total contribution of \$0.10), effective May 6, 2012. This will result in an increase in the Boilermaker wage package by a total of \$0.02/hour. The increased contributions will allow the NTTF to provide the various programs and services necessary to train existing and new members of the Boilermaker trade.

Please see the attached wage and benefit schedules that reflect these changes.

Please contact the BCA should you have any questions.
